

6-8 Available Credentials and Qualifications

(a) Teaching license

Can be acquired in all faculties and divisions, making it possible to utilize the things learned in the major courses taken in the faculty/division. The details are given below.

Class 1 licenses

Faculty	Division	License type and subject			
		Junior high school (Class 1)	High school (Class 1)	Other license types	
Faculty of Letters and Education	Division of Liberal Arts and Humanities	Social studies	Geography Civics		
	Division of Languages and Culture Japanese language and literature course	Japanese	Japanese		
	Chinese language and culture course	Chinese	Chinese		
	English language and culture course	English	English		
	Division of Human and Social Sciences Social sciences course	Social studies	Civics		
	Elementary school/ kindergarten course			Elementary school (Class 1)	kindergarten (Class 1)
	Division of Performing Arts Dance and dance education course	Physical education	Physical education		
Music course	Music	Music			
Faculty of Science	Department of Mathematics	Mathematics	Mathematics		
	Department of Physics	Science	Science		
	Department of Chemistry	Science	Science		
	Department of Biology	Science	Science		
	Department of Information Sciences Mathematics course	Mathematics	Mathematics		
	Information course		Information		
Faculty of Human Life and Environmental Sciences	Division of Human Life Studies Home course	Home economics	Home economics		
	Division of Nutrition and Food Science			Nutrition educator (Class 1)	

Vocational certificates

Program	Division	License type and subject			
		Junior high school (specialized)	High school (specialized)	Other license types	
Humanities and Sciences Master's Program	Division of Comparative Studies of Societies and Cultures				
	Japanese course	Japanese	Japanese		
	Chinese course	Chinese	Chinese		
	English course	English	English		
	Social studies course	Social studies	Geography History, Civics		
	Physical education course	Physical education	Physical education		
	Music course	Music	Music		
Home course	Home economics	Home economics			

	Division of Human Developmental Sciences	All subjects indicated in Article 4 Paragraph 5 Item 1 of the Educational Personnel Certification Act (foreign languages limited to English, Chinese).	All subjects indicated in Article 4 Paragraph 5 Item 2 of the Educational Personnel Certification Act (foreign languages limited to English, Chinese).	Elementary school (specialized)	Kindergarten (specialized)
	Gender and Social Sciences				
	Social studies course	Social studies	Geography History Civics		
	Home course	Home economics	Home economics		
	Division of Life Sciences				
	Home course	Home economics	Home economics		
	Science course	Science	Science		
	Division of Advanced Sciences				
	Science course	Science	Science		
	Mathematics course	Mathematics	Mathematics		
	Information course		Information		
	Division of Cooperative Major in Human centered Engineering	Home economics	Home economics		

(b) CURATOR certification

To acquire qualifications as a Curator, students must earn the credits required for graduation, as well as the credits stipulated by the University in accordance with the Ordinance for Enforcement of the Act on Museums. Accordingly, students who desire to acquire those qualifications must take courses in a planned manner, beginning in their first years at the University.

Students enrolled in the Faculty of Letters and Education, or the Division of Human Life Studies in the Faculty of Human Life and Environmental Sciences, should take elective subjects selected from cultural history, art history, archaeology, and ethnology, while students enrolled in the Faculty of Science or the Division of Nutrition and Food Science in the Faculty of Human Life and Environmental Sciences should take elective subjects selected from physics, chemistry, biology, and geology.

When a student is hired as a CURATOR, she must submit to the appointer (the administering organization for museums, such as the prefectural/municipal board of education) the diploma and transcript of credits for courses related to Curator certification that are issued by the University.

The training required to acquire the qualifications to be a Curator (museum) at the University is intended for undergraduate students, and cannot be taken by graduate students. However, if there is sufficient capacity to accommodate the number of students, etc., students in a master's program are sometimes able to take the courses. Students who are interested should consult with the Academic Affairs Office.

(c) Japanese Language Teachers

A Japanese language teacher is a teacher who teaches Japanese not as a native language but as a second language to people who are learning Japanese, for example, foreign nationals.

With the globalization of society, there is a growing need for Japanese language instructors to teach Japanese both in Japan and abroad.

In addition to teaching the Japanese language and culture, Japanese language instructors are expected to play a role in fostering citizenship in a globalized society.

In order to respond to such social needs, we have established a training program for Japanese language instructors.

Students who complete the required credits in this course are qualified to work as Japanese language teachers at Japanese language schools and other Japanese language education institutions in Japan after graduation.

Upon request from the student, a certificate of completion of the course will be issued to those who have completed the course.

This program is designed for students in the Japanese Language Education Course of the Department of Comparative Studies in Society and Culture.

This course is an educational program to acquire 26 credits or more in subjects related to Japanese language education as required by the Notification Standards for Japanese Language Institutions (formulated by the Immigration Bureau of the Ministry of Justice on July 22, 2016).

(d) Social researcher certification and Professional Social Investigator

(1) Social researcher certification

Social researcher certifications are approved and issued by the Japanese Association for Social Research, and verify that the certified individual has acquired the basic knowledge, techniques, and applied skills related to social research, as well as a sense of ethics.

Certification requires individuals to learn the standard curriculum at an organization or university that has been approved by the Japanese Association for Social Research, and earn an undergraduate degree from a university. In addition, certification as a social researcher is a requirement for certification as the higher level specialized social researcher.

At Ochanomizu University, the applicable curriculum is organized jointly by the Geography Program, Division of Liberal Arts and Humanities, Faculty of Letters and Education; the Psychology Program, Educational Sciences Program, and Sociology Program, Division of Human and Social Sciences, Faculty of Letters and Education; Global Studies for Inter-Cultural Cooperation, Faculty of Letters and Education; and the Developmental Clinical Psychology Program and Social Sciences and Family Studies Program, Division of Human Life Studies, Faculty of Human Life and Environmental Sciences. In order to acquire the qualifications to be a social researcher, it is necessary to earn the credits required for graduation, as well as to take the stipulated courses that have been certified as corresponding to the standard curriculum A through G established by the Japanese Certification Board for Social Research. Students who desire to acquire such qualifications must systematically take the necessary courses beginning at an early stage. The specific courses that correspond to the standard curriculum differ each academic year. In addition, be aware that there may be restrictions on practical training courses for G. Details are given at explanatory meetings, etc., scheduled at the beginning of each school year.

(2) Professional Social Investigator

The Professional Social Investigator certification is issued by the Japanese Association for Social Research and certifies that a professional social researcher has acquired a high level of research skills.

It certifies that the candidate is a professional social researcher who has acquired advanced research skills. In our graduate school, the Master's Course in Human Developmental Sciences and the Master's Course in Gender and Social Sciences jointly offer the corresponding curriculum.

The Graduate School of Social Research has jointly organized the corresponding curriculum.

In order to qualify as a professional social researcher, students must possess the undergraduate level qualification as a social researcher, and must meet the standard

To qualify as a professional social researcher, students must hold a social research qualification at the undergraduate level, complete the prescribed courses approved as corresponding to Curriculum H, I, and J, and write a master's thesis (research paper) using the results of social research.

The master's degree program must be completed by writing a master's thesis (research paper) using the results of social research. Students may obtain both a bachelor of social research and a bachelor of professional social research at the same time.

Students wishing to acquire the qualifications must begin taking courses early and systematically. The specific courses that correspond to the standard curriculum vary from year to year.

Please note that the specific courses that correspond to the standard curriculum vary from year to year, and some courses are offered every other year. Please contact the Social Research Associate Liaison for more information.

If you wish to obtain an undergraduate social researcher certificate at the same time, you will need to complete 10 credits of approved courses offered by the faculty as a non-degree student.

If you wish to obtain an undergraduate social researcher certificate at the same time, you must become a credited student and earn 10 credits from approved undergraduate courses. The application period for credited auditors is limited, so please do your research early and plan accordingly. In addition, students are required to take undergraduate courses for the purpose of acquiring qualifications,

If you wish to become an undergraduate credited student for the purpose of acquiring a qualification, please take advantage of the exemption from the entrance fee and tuition.

(f)Dietitian certification

Certification as a dietitian can be acquired by taking the required courses in the Division of Nutrition and Food Science, Faculty of Human Life and Environmental Sciences (acquiring the 138 credits required for graduation).

(g)Food sanitation supervisors and food sanitation inspectors

Students who acquire 40 or more credits, with at least 22 from Groups A through D below combined with credits from Group E, obtain certification as food sanitation supervisors and food sanitation inspectors. These certifications constitute appointment qualifications indicating that the individual can take that assignment when hired for the required occupation.

Specialized field	Course subject	Credits	Specialized field	Course subject	Credits	
Group A Chemistry	⊙ Basic Organic Chemistry	2	Group E Related subjects	⊙ Nutrient Metabolism	2	
	⊙ Analytical Chemistry	2		⊙ Nutrition and Diseases	2	
	⊙ Experimental Studies of Analytical Chemistry	2		⊙ Cookery Science	2	
Group B Biochemistry	⊙ Biochemistry	2		⊙ Nutrition Laboratory	2

Group D Biomedical Sciences and Society	⊙ Food Hygiene	2				
	⊙ Environmental Science of life	2				
	⊙ Public Hygiene	2				

⊙: Required course

(h)Eligibility to take the national exam for national registered dietitians

National registered dietitians are specialists who engage in nutritional management for specialized treatment of illness based on the nutritional evaluation/assessment of the patient at medical institutions, etc., provide specialized nutritional guidance to promote better health at healthcare centers, and conduct food service management that requires special considerations in accordance with the nutritional status of users of special food service facilities, etc. Students who take the required courses in the Division of Nutrition and Food Science, Faculty of Human Life and Environmental Sciences (acquiring the 138 credits required for graduation) are granted eligibility to take the national exam.

(i)Eligibility to take the national exam for architects**Students in the Department of Human-Environmental Science, Division of Human Life and Environmental Sciences****○ Eligibility to take the national exam for Class 1 architects**

Students who have enrolled in the Department of Human-Environmental Science, earned no fewer than the required number of credits in the stipulated courses related to eligibility to take the national exam for Class 1 architects, in accordance with the conditions, and graduated, can be granted eligibility to take the national exam for Class 1 architects after gaining hands-on experience related to architecture. (The required length of experience is either 3 years or 4 years, depending on the number of credits earned.)

See “Courses for Eligibility to Take the National Exam for Architects (Eligibility to Take the National Exam for Class 1 Architects)” for information regarding the conditions for earning credits, the necessary credits, and the required hands-on experience.

○ Eligibility to take the national exam for Class 2 architects

Students who have enrolled in the Department of Human-Environmental Science, earned no fewer than the required number of credits in the stipulated courses related to eligibility to take the national exam for Class 2 architects, in accordance with the conditions, and graduated, can be granted eligibility to take the national exam for Class 2 architects. (The required length of hands-on experience is 0 years to 2 years, depending on the number of credits earned.)

See “Courses for Eligibility to Take the National Exam for Architects (Eligibility to Take the National Exam for Class 2 Architects)” for information regarding the conditions for earning credits, the necessary credits, and the required hands-on experience.

Students outside the Department of Human-Environmental Science, Division of Human Life and Environmental Sciences

○ **Eligibility to take the national exam for Class 2 architects**

Students who have studied in the Human-Environmental Science subprogram, earned no fewer than the required number of credits in the stipulated courses related to eligibility to take the national exam for Class 2 architects, in accordance with the conditions, and graduated, can be granted eligibility to take the national exam for Class 2 architects. (The required length of hands-on experience is 0 years to 2 years, depending on the number of credits earned.)

See “Courses for Eligibility to Take the National Exam for Architects (Eligibility to Take the National Exam for Class 2 Architects)” for information regarding the conditions for earning credits, the necessary credits, and the required hands-on experience.

○ **Eligibility to take the national exam for Class 1 architects (Cases in which students from outside the Department of Human-Environmental Science, Division of Human Life and Environmental Sciences want to be granted eligibility to take the national exam for Class 1 architects)**

In cases in which a student from outside the Department of Human-Environmental Science wants to be granted eligibility to take the national exam for Class 1 architects, the individual certification system of the Ministry of Land, Infrastructure, Transport and Tourism is used. However, be sure to give sufficient consideration to the fact that students must submit applications for this on their own, and that it is possible that they will not be certified in some cases. (Consult with a member of the Department of Human-Environmental Science faculty in advance.)

The courses related to being granted eligibility to take the national exam for Class 1 architects, conditions for earning credits, required credits, and required hands-on experience are identical to those for eligibility to take the national exam for Class 1 architects in the Department of Human-Environmental Science, Division of Human Life and Environmental Sciences. See “Courses for Eligibility to Take the National Exam for Architects (Eligibility to Take the National Exam for Class 1 Architects)” for more information.

Course requirements are strict and it will be difficult for students from outside the Department of Human-Environmental Science to undergo the training to be granted eligibility to take the national exam for either Class 1 architects or Class 2 architects.

Students who want to be granted eligibility to take the exam should be sure to consult with a member of the Department of Human-Environmental Science faculty in advance

(j)Licensed Psychologist

A licensed psychologist is a national licensed psychologist who provides consultation and assistance to persons in need of psychological support and related persons. At the undergraduate level, students must master all 25

At the undergraduate level, students must acquire all of the nationally required 25 subjects to be eligible to take the exam. The university offers all 25 courses, but some of them are restricted,

However, some of these courses are restricted, so only students in the Psychology Department of the Faculty of Life Sciences are qualified to take the examination. The following is a list of courses offered at the University.

The following is a list of courses offered at the University

	Nationally defined course titles	Courses offered at the university	Number of credits
1	Professional Responsibility of Certified Psychologists	Professional Ethics of Psychology (Professional Responsibility of Certified Psychologists)	2
2	Introduction to Psychology	Introduction to Psychology Science of Mind (Introduction to Psychology)	2
3	Introduction to Clinical Psychology	Introduction to Clinical Psychology	2

25	Psychological practice I	Psychological clinical practice I	2

(k)Clinical Psychologist

Clinical psychologists are licensed by the Japanese Certification Board for Clinical Psychologists (JCBP) after passing the certification examination. The Developmental Clinical Psychology Course has been designated as a Type 1 graduate school by the Japanese Certification Board for Clinical Psychologists since 2001. Students in this course are eligible to take the examination for the clinical psychologist certification after completing a total of 26 credits, including all 16 credits from the required courses (10 courses offered at the university) and at least 2 credits from each of the elective required courses (ABCDE group), for a total of at least 10 credits. Students in other courses may only take courses in the ABCD group.

Course Classification	Qualifying Association Courses	Courses Offered at the University	Number of Credits
